scim-input-pad 0.1.0 has been released.

Author: James Su<james.su@gmail.com>

It's the first stable version. Ready to be included into distributions.

Changes since 0.0.3:

- A "Recently used" group was added to hold the recently used items. japanese.pad.in was updated a little. po files were updated.

Please test this version and give us feedback. Translations for other languages are always welcome.

You can get the source tarball at usual place.
