

skim 1.2.1 is announced

Author: Cougar Liu<liucougar@scim-im.org>

This is a major bug fix release, everyone are highly recommended to upgrade from previous version.^^

ChangeLog since last stable release 1.2.0:

- now all exit issue with skim should have been fixed
- SCIM standalone helper module menu support (scim-input-pad can be called in skim now)
- Workaround for issues in Qt 3.3.4 qtim patch

You can download it in the [usual place](#).
