

scim-anthy-0.5.0 has been released

Author: Takuro Ashie<ashie@homa.ne.jp>

This release includes major feature enhancements.

Overview of Changes from scim-anthy-0.4.3 to scim-anthy-0.5.0

- Customizable romaji table. Add "Key bindings theme" and "Romaji table theme" features. (Thank you for testing and many suggestions > UTUMI-san and Bando-san) Add "Convert as you type" feature. Enable to split a romaji syllable on editing preedit string. (Thanks! DAIRIKI-san) Rotate case of alphabet letters on pressing F8, F9 and F10 key like ATOK or Microsoft IME. Other minor bug fixes. (Thanks! UTUMI-san, SATO-san)

You can download it from sourceforge.jp.
