

# kmfl-0.8 Released

Author: Doug Rintoul<doug\_rintoul@sil.org>

kmfl-0.8 has been released. Source, RPMs for SuSE 9.2 and debs for Ubuntu Hoary Hedgehog can be downloaded from <http://sourceforge.net/projects/kmfl>.

kmfl-0.8 adds full support for virtual keys. This includes the ability to specify keystrokes which distinguish between left and right shift, ctrl and alt keys. See the section on keystroke constants in the [kmflcomp](#) documentation for more information.
