

Stable skim release 1.4.0 is available

Author: Cougar Liu<liucougar@scim-im.org>

The first version in the stable 1.4 branch of skim is just available for all users. Please upgrade to this version, especially if skim 1.3.x is running in your system.

ChangeLog since last stable release skim 1.2.3

- new: Transparent Window support and the configure UI
- new: Main Window Dockable into Panel (only works with kicker)
- new: 4 Direction support in Main Window
- new: reworked Always show option of Main Window
- new: three more modifier keys support (meta/hyper/super) and a config options to customize modifiers
- new: filter setup dialog for the filter mechanism (new to libscim 1.3.0)
- improvement: refined configure dialog to be more user friendly, re-structured the hierachy and new icons
- improvement: do not display the border of the next/previous buttons; hide next/previous button when disabled; (thanks to cjacker for advice)
- improvement: smaller buttons in main toolbar which just use as little space as possible
- improvement: String layout in Input Window
- new: SCIM Setup can be added to the Main Toolbar
- improvement: performance of input window and fixed the flitter issue
- migrated to a more advanced build system bksys
- fixed other bugs

Check out the [screenshots](#) to find out the new features introduced in this stable release compared to 1.2.x.

ChangeLog since last test release skim 1.3.3

- fixed remaining build system issues: skim 1.4.0 should be ready for packagers
