

# scim 1.4.2 is available.

Author: James Su<james.su@gmail.com>

Some bugfixes and enhancements were made in this version.

Changes since 1.4.1:

- RawCode IMEngine was enhanced to support all planes of UCS-4. A bug of focus IC handling was fixed. Support of compose keys will be disabled if English/European input method is disabled. A bug in Generic IMEngine setup module was fixed.

If scim 1.4.1 works well for you, upgrading is not necessary.
