

scim-anthy-0.8.0 has been released

Author: Takuro Ashie<ashie@homa.ne.jp>

scim-anthy-0.8.0 has been released. It includes some new features like prediction and reversion.

scim-anthy-0.8.0 has been released. It includes some new features like prediction and reversion.

Changes from scim-anthy-0.7.1:

- Now scim-anthy requires scim-1.2.0 or later. Add prediction feature. Add reversion feature. It can reconvert already committed string. Currently this feature will be enabled only on Gtk+2. Default thumb shift layout has been improved. Add timer for thumb shift layout. Some key bindings are modified. Please select "Default" key bindings theme in the setup window once to upgrade safely. Add Wnn like style file. Add TRON layout. Thanks Okano Shinchi. Apply ten key setting exactly on all input modes. Add help text.
