

scim 1.4.3 has been released.

Author: James Su<james.su@gmail.com>

It's a next stable version for 1.4 branch. It's mainly a bugfix version.

Changes since 1.4.2:

- cvs2cl.pl was used to generate ChangeLog. A feature to hide toolbar of gtk panel completely was added. Several bugs in various components were fixed (see ChangeLog for details). Two unnecessary source files in XIM FrontEnd were removed.

Go to download section to download the source package.

Have fun.
