

skim 1.4.5 is released

Author: Cougar Liu<liucougar@scim-im.org>

Another minor bug fix version of skim is made available today. It is generally recommended to upgrade from previous skim versions.

The changes since last stable version 1.4.4 are:

- Fixed: crash issue when deleting helper properties
- Improved: implement session management support to save user config when logout from session
- Fixed: compilation with qt 3.3.6
- Updated: Korean translation

Please download it in [sourceforge](#).
