

scim 1.4.5 has been released

Author: James Su<james.su@gmail.com>

It's mainly a bugfix version of stable 1.4 branch. Upgrade is encouraged for all users.

Many bugs have been fixed since 1.4.4, such as:

- Several byte order issues in XIM FrontEnd were fixed, which causes scim's XIM server unusable across two hardware platforms with different byte order.
- Several bugs of libscim were fixed.
- gtk immodule was improved to support some special gtk applications which don't use gtk main loop.
- Many improvement for scim-panel-gtk.
- Swedish translation was added, thanks Leo Wallentin.
- Finnish translation was added, thanks Timo Jyrinki.
- Usability of RawCode input engine has been enhanced.

Please refer to ChangeLog file in source tarball for details.
