

scim-m17n 0.2.1 has been released.

Author: James Su<james.su@gmail.com>

It's a minor enhancement version.

Changes since 0.2.0:

- Name prefix "M17N-" has been removed. m17n languages and names are used as UUIDs instead of a fixed set of pre-allocated UUIDs. Surrounding text support has been improved.

Have fun.
