

scim 1.4.6 has been released.

Author: James Su<james.su@gmail.com>

It's a bugfix version of 1.4 stable branch. Lots of bugs have been fixed.

Changes since 1.4.5:

- Fixed BSD Support. Added jp106 keyboard support, thanks Ryo Dairiki and Takuro Ashie. Fixed Lookup table flickering in some gtk applications. Adjusts the position of toolbar according to the size of current work area. Uses GtkEventBox instead of GtkButton in tray icon. Doesn't set locale if it's already set. Added Dutch translation. Thanks Ronald Stroethoff.
