

# scim 1.2.1 has been released.

Author: James Su<james.su@gmail.com>

It's a minor bugfix version. If you are using 1.2.0 without any problem, then upgrading to 1.2.1 is not necessary.

Changes since 1.2.0:

- gettext was updated to 0.14.1
- intltool was updated to 0.33
- a potential null pointer bug in scim\_utility.cpp was fixed.
- a KeyEvent forwarding issue in scim gtkimmodule was fixed.
- es.po was added.
- a new handy api scim\_get\_current\_language () was added into scim\_utility.cpp.
