

Why I can not input with SCIM under OpenOffice (Oo)?

Why I can not input with SCIM under OpenOffice (Oo)?

The default UI of OpenOffice is gtk+2 based, however Oo simply does not use gtk im module, so you have to use XIM with OpenOffice: to specify XMODIFIER correctly and have a proper locale. Please consult [this](#) or the configure section of your favorite distro, for details. For trouble shooting, please see [this](#).
