

# scim 1.2.3 is available

Author: Cougar Liu<liucougar@scim-im.org>

Another minor bug fix version is released.

ChangeLog since scim 1.2.2:

- Don't match language when switching to next/previous factory. Make scim-helper-launcher uses the default config module set in global config file. Fixed the recursive calling issue of SocketIMEngine. A small bug in scim-panel-gtk was also fixed.

Please download it from [the normal place](#).
