

scim tables 0.5.5 is available.

Author: James Su<james.su@gmail.com>

It's a new stable release.

Changes since 0.5.4:

- pa translation was added. A new EZ table was added, called EZ-Big, the old one was removed. Thanks Woodman Tuen. Simplex and ZhuYin tables were updated according to cin files published by <http://opendesktop.org.tw>. A new CangJie table was added, which was ported from cj.cin published by <http://opendesktop.org.tw>. The old one was renamed to CangJie5. The incorrect order of entries issue was fixed. A man page for scim-make-table was added, thanks Ming Hua.
