

# scim-tables 0.5.6 has been released.

Author: James Su<james.su@gmail.com>

A minor enhancement version.

Changes since 0.5.5:

- Options KEY\_END\_CHARS, MODE\_SWITCH\_KEYS, FULL\_WIDTH\_PUNCT\_KEYS and FULL\_WIDTH\_LETTER\_KEYS were added into table header.
- ZhuYin-Big table was added, which has about 90000 chars to meet Taiwan's requirement.
- A new table CNS11643 was added.
- Cantonese table was moved to Traditional Chinese group.
- Various other fixes.
