

# Skim 1.4.4 is released

Author: Cougar Liu<liucougar@scim-im.org>

This release is a "Happy Chinese (Lunar) New Year" version to all Chinese users (probably to Korean and Japanese users as well). Several annoying bugs were fixed. Upgrading is recommend for everyone.

## ChangeLog since skim 1.4.3

- Fixed: -f option did not work properly
- Fixed: name of Built-in compose (european keyboard support) IM
- Fixed: kde 3.3 compatibility
- Fixed: filter saving bugs
- Improved: user can not disable the setupwindow plugin to prevent users from having no configure dialog by accident
- Improved: display the name of the current IM by default
- Added: Panjabi(pa) translation
