

Brand new dual CPU server

Author: Cougar Liu<liucougar@scim-im.org>

Thanks to our generous sponsor [AWTOHOST](#), this website is now hosted at a much faster server, with dual CPU (P4 3.0G) and 1G of RAM. The service should not be interrupted in any way. If you do notice issues with this new server, please post comment to this news.

Thanks again to SCIM project sponser [AWTOHOST](#).
